

Environmental policy

GoPro and its subsidiaries are a software and a service provider. Our mission is to develop software solutions for public and private sector to allow them to maximise the use of digital opportunities so their staff can work efficiently and effectively when servicing customer in the best possible way.

As a part of GoPro operation an environmental policy has been set by the company, which aims to support sustainable development.

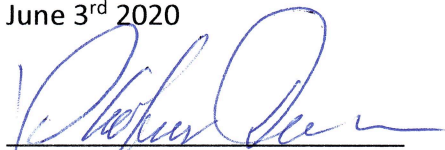

This policy applies to all activities undertaken by GoPro and its subsidiaries (including Hugvit, Canalix, GoPro Consulting and Itss) and impacts upon key suppliers and customers.

We are committed to minimising the environmental impact of our operations. In particular, we will achieve this through our commitment to:

- Comply with all relevant legislation and regulations;
- Regularly review the environmental impact of our activities, endeavour to reduce our overall environmental impact and prevent waste using best practice techniques;
- Involve and work with our employees to improve our operations in regard to environment;
- Seek to select environmentally friendly service and products, where relevant;
- Prioritised use of environmentally friendly and renewable energy, for our companies;
- Promote and provide facilities for enable employees to use environmentally friendly transport options, such as bicycling to work or use public transport and use of environmentally friendly cars;
- Sort waste from our activities and minimize waste by using reusable products.
- Improve resource efficiency (including use of water, energy and raw materials)

This policy is published on the company web.
